

What makes a family

What makes a family?
What ingredients do you need?
Stir it up and see.
How many people does it take
For one family to make?
Count them up and see.

Everybody's family is different
And different is how they should be.

*We are red we are orange and yellow
We are green, blue and indigo
We're unique, we are all different colours
But together we're a rainbow.*

What makes a family?
Is it something we can see?
Take a look with me.
And what makes a happy home?
Is it knowing we're not alone?
There is someone here for me.
Everybody's someone is different
And different is how they should be.

*We are red we are orange and yellow
We are green, blue and indigo
We're unique, we are all different colours
But together we're a rainbow.*

Nobody's family's perfect all the time
It takes a little bit of rain and a little bit of sunshine

*We are red we are orange and yellow
We are green, blue and indigo
We're unique, we are all different colours
But together we're a rainbow.*
